

AHMED W M AWWAD

DATA ANALYST

Gaza, Gaza Strip | 59-525-0040 (972) | awwadahmed407@gmail.com | www.linkedin.com/in/ahmedwadieawwad/

SUMMARY

Detail-oriented Data Analyst with a Bachelor's degree in Information Technology (88.92% GPA) and hands-on experience in data pipelines, business intelligence, and statistical analysis. Proficient in transforming complex, raw datasets into structured, analysis-ready formats using SQL, Python (Pandas), and Excel. Skilled in building interactive Power BI dashboards that drive data-informed business decisions. Demonstrated ability to execute exploratory data analysis (EDA), extract insights via web scraping, and collaborate effectively across independent and team-driven technical projects.

SKILLS

- **Data Analysis & EDA:** Data Cleaning, Data Transformation, Predictive Analytics, KPI Optimization, Trend Identification, Regular Expressions (Regex)
- **SQL / Databases:** MySQL, SQL Server, Complex JOINS, Subqueries, CTEs, Temporary Tables, Aggregations, Window Functions
- **Python & Automation:** Python, Pandas, NumPy, BeautifulSoup (Web Scraping), Automation Scripts, Tkinter
- **Business Intelligence (BI):** Power BI, Power Query, DAX, Advanced Excel (Pivot Tables, XLOOKUP, Data Modeling), Reporting
- **Cloud & Tools:** AWS, Azure, Cloud Data Analytics, Google Sheets, Git, Kobo, Google Forms, Microsoft Office
- **Languages:** Arabic (Native), English (Fluent)

EXPERIENCE

Data Analysis / Technical Projects | Freelance / Upwork — 2021–Present

- Extracted, cleaned, and standardized 10,000+ records from CSV, JSON, and web-scraped sources using Python (Pandas) and SQL, identifying and resolving data anomalies to improve data quality and reporting readiness.
- Built 3+ interactive Power BI dashboards using Power Query and DAX to visualize industry metrics, customer satisfaction, and salary distributions, transforming raw data into actionable business insights.
- Performed Exploratory Data Analysis (EDA) on historical business datasets (2020–2023), executing advanced SQL queries, CTEs, and aggregations to uncover market trends and operational insights.
- Built a custom Python web scraper using BeautifulSoup to automate pricing data collection from 1,000+ products, applying Regex and Pandas to validate, clean, and structure datasets for market analysis.

Teacher Assistant | Islamic University of Gaza — September 2022–June 2023

- Facilitated technical lab sessions and mentored 60+ undergraduate IT students on relational database designs, SQL querying fundamentals.
- Evaluated 50+ practical course projects and assignments, providing technical mentorship that improved students' hands-on coding and problem solving capabilities.

PROJECTS

COVID 19 Data Exploration

Technologies: SQL Server, T-SQL, EDA

- Explored global COVID-19 data using SQL Server to identify trends and patterns, used queries, joins, aggregations, and analytical techniques to extract insights.

Power BI Data Professionals Survey Dashboard

Technologies: Power BI, Power Query, DAX, Data Visualization

- Ingested and transformed a global survey dataset of tech professionals. Built an end-to-end interactive dashboard visualizing salaries, programming language popularity, and job satisfaction metrics to deliver clear workforce insights.

Business Sales Performance Analysis

Technologies: Microsoft Excel, Power Pivot, Data Modeling

- Modeled transactional sales data using advanced Excel features, including Pivot Tables, XLOOKUP, and conditional formatting, to generate comprehensive executive reports and highlight high-performing regions.

E-Commerce Price & Product Web Scraper

Technologies: Python, BeautifulSoup, Pandas, Regex

- Engineered an automated script to scrape product and pricing data from Amazon. Cleaned the unstructured textual output using Regular Expressions and structured it into Pandas DataFrames for active market pricing analysis.

Automatic File Sorter

Technologies: Python, Tkinter, OS Automation

- Programmed a desktop utility with a graphical user interface (GUI) to automate local directory organization, optimizing file management workflows based on extensions.

Personal Portfolio Website | IT & Data Analysis Portfolio

Technologies: HTML, CSS, JavaScript, jQuery, GitHub Pages

- Designed and created a responsive personal portfolio website to showcase professional skills, projects, and technical experience.
- Organized projects and technical skills across IT, Web/Mobile Development, and Data Analysis.

EDUCATION

Bachelor of Information Technology | Islamic University of Gaza (IUG) | 2022 | GPA: 88.92%

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Coursera
- Data Analyst Bootcamp Certification — AlexAnder
- AWS / Azure Data & Cloud Fundamentals Certificate
- Complete PYTHON Programming — Udemy
- Excellence Grant — Islamic University of Gaza
